# The partnerships that mark our journey

# The partnerships that mark our journey

The signing between Takween AI and MODON marks the beginning of a new era in industrial transformation, where artificial intelligence becomes the driving force behind smarter cities, advanced manufacturing, and a data-driven future built in the Kingdom, for the Kingdom.

# The partnerships that mark our journey

The partnership between Takween AI and Emaan International embodies the fusion of artificial intelligence with **military** and **CBRNe innovation**, where technology meets mission-critical precision. Together, they are pioneering intelligent defense systems that enhance situational awareness, operational readiness, and national resilience—advancing the Kingdom’s vision for a smarter and more secure future.

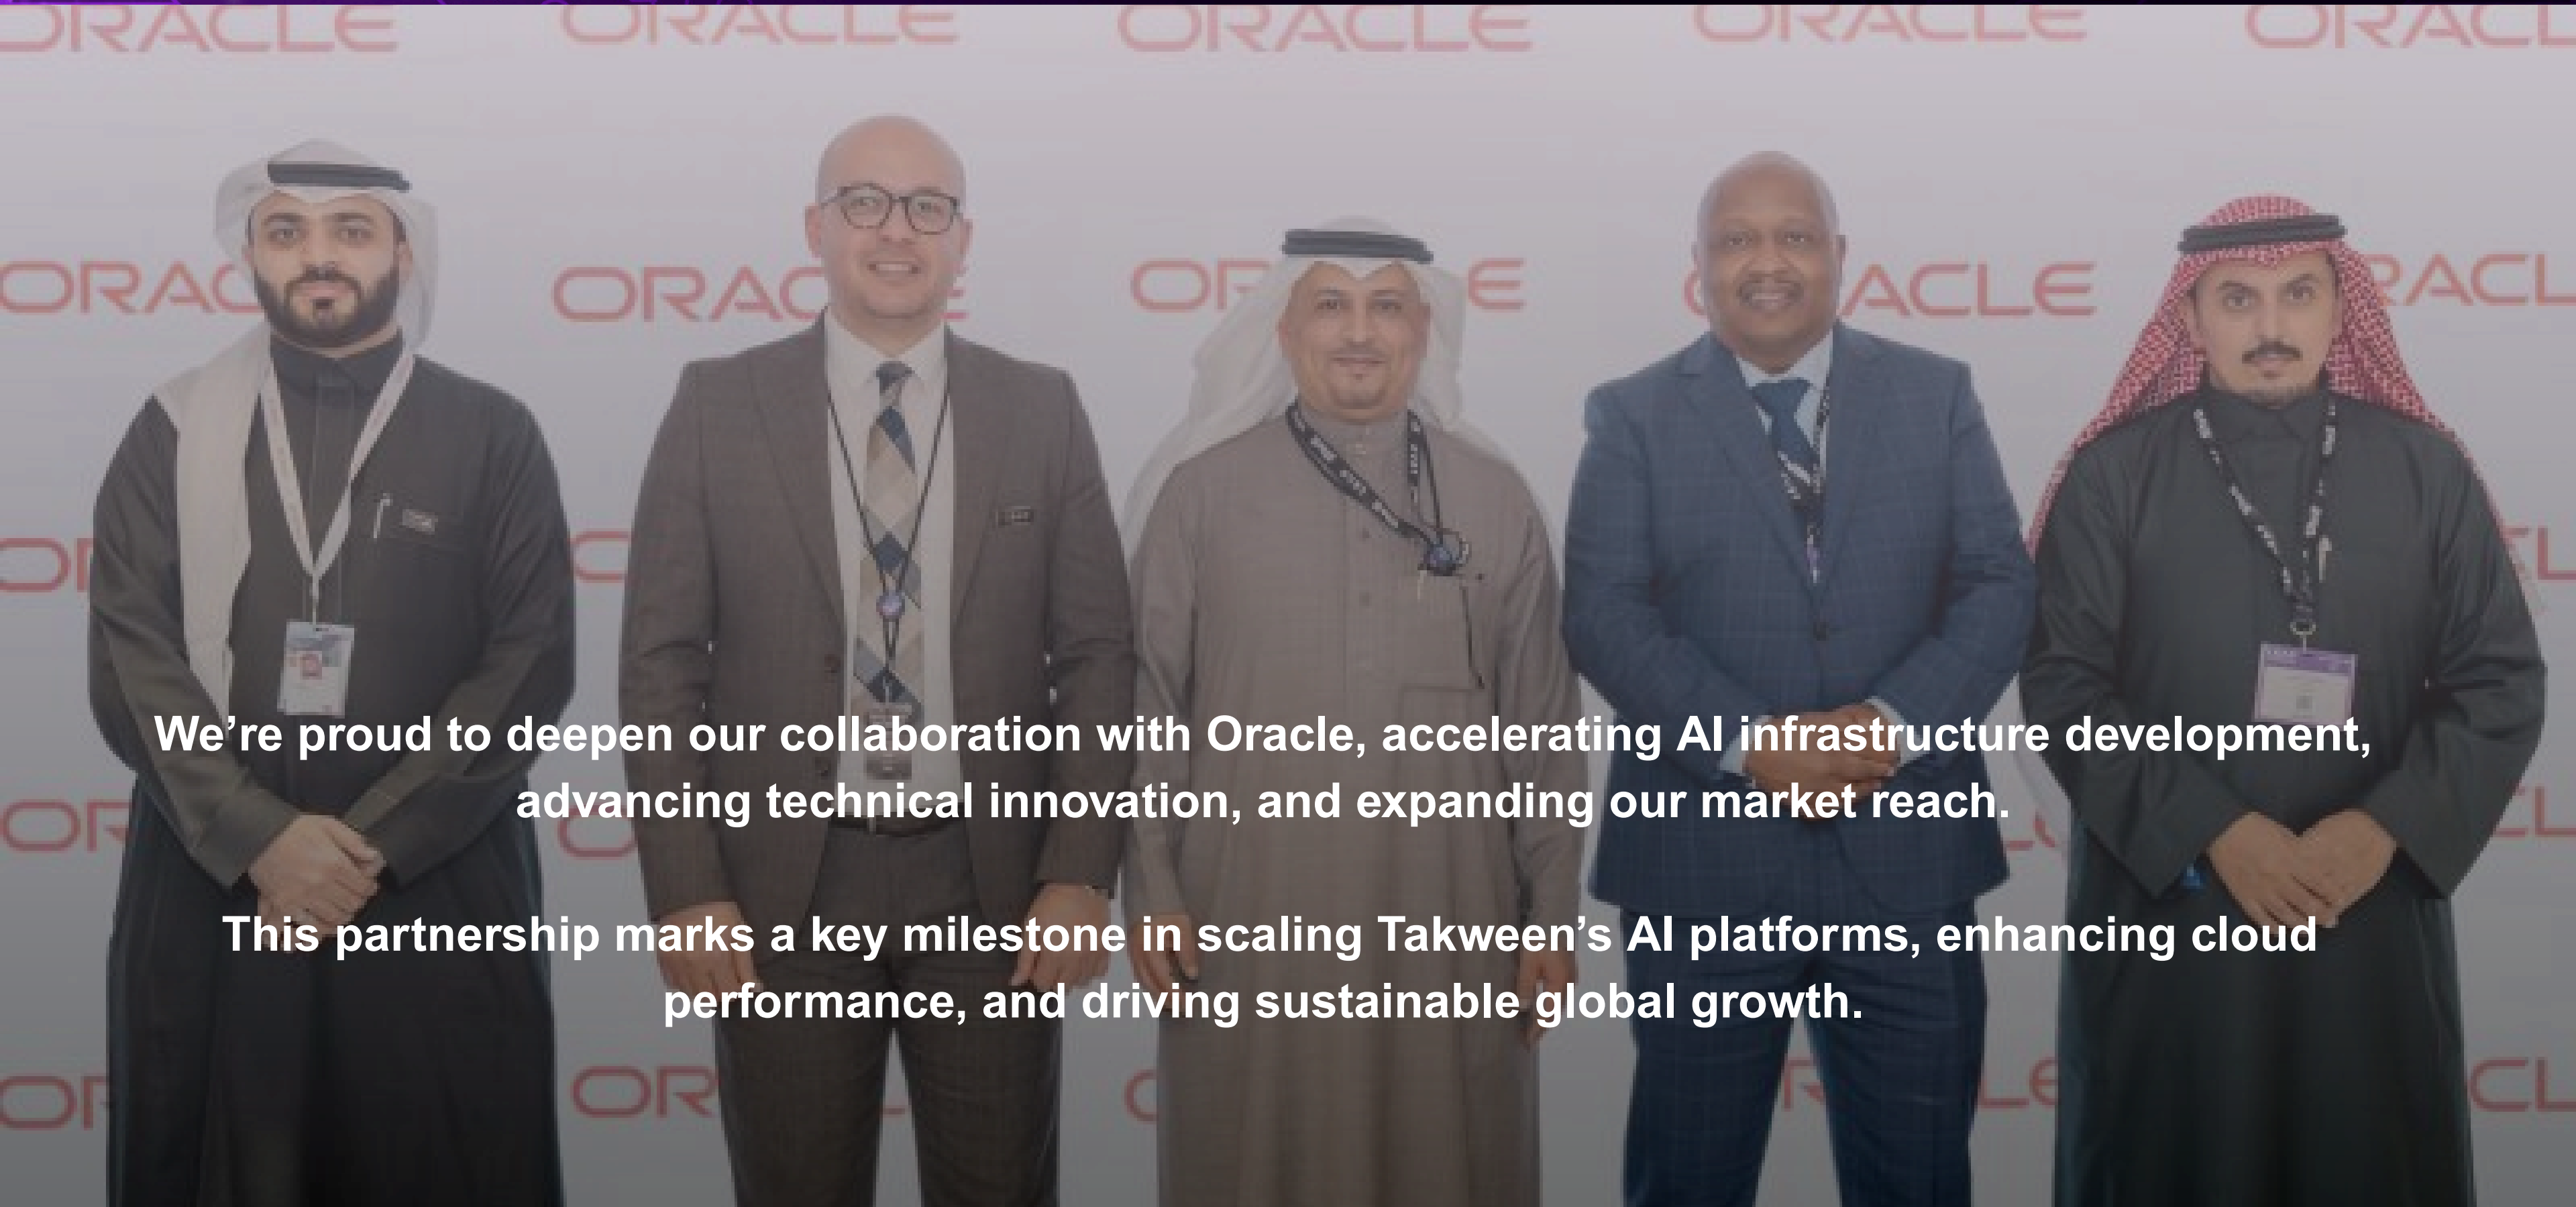

# The partnerships that mark our journey

At Takween AI, we're proud to have signed a strategic partnership with Asas, marking a new step toward advancing Saudi Arabia's digital transformation journey.

Together, we're combining deep AI expertise with Asas's operational excellence to build innovative, secure, and scalable solutions, empowering enterprises and shaping the future of intelligent business in the Kingdom.

# The partnerships that mark our journey

A group of five men standing in a row against a backdrop with the Oracle logo repeated. From left to right: a man in a dark thobe and white ghutra, a man in a grey suit and glasses, a man in a grey thobe and white ghutra, a man in a blue suit, and a man in a dark thobe and red and white checkered ghutra. All are wearing lanyards with ID badges.

**We're proud to deepen our collaboration with Oracle, accelerating AI infrastructure development, advancing technical innovation, and expanding our market reach.**

**This partnership marks a key milestone in scaling Takween's AI platforms, enhancing cloud performance, and driving sustainable global growth.**

# The partnerships that mark our journey

**We're proud to partner with Tawuniya Insurance to redefine the future of insurance through AI! This collaboration will focus on enhancing efficiency, improving risk assessment, and driving innovation in claims processing, pricing strategies, and fraud detection.**

# The partnerships that mark our journey

A photograph of two men in business attire shaking hands. The man on the left is wearing a dark suit and a black shirt, while the man on the right is wearing a blue suit and a blue tie. They are standing in front of a backdrop that features the Dell Technologies logo and the Takween logo (a stylized 'ز' symbol) in Arabic and English. The backdrop is blue and white with a pattern of light streaks. There are also small flags on the table in front of them, one with the Dell Technologies logo and one with the Takween logo. A large Dell Technologies flag is visible on the right side of the image.

**We're proud to partner with Dell Technologies, a collaboration that represents the synergy between Saudi innovation and global technological excellence.**

**Through this partnership, Takween AI continues to advance the Kingdom's Vision 2030 by delivering enterprise-grade AI infrastructure designed for a smarter, data-driven future.**

# The partnerships that mark our journey

A photograph of four men in business attire shaking hands. The man on the far left is an older white man with glasses, wearing a dark suit and a blue and white striped tie. The man next to him is a Black man in a dark suit and tie. The man in the center is wearing a traditional Saudi headdress (ghutra and agal) and a dark thobe, with a lanyard around his neck. The man on the far right is a white man with glasses, wearing a dark suit. They are standing in front of a blue and white geometric patterned backdrop.

At Takween AI, we were honored to meet with Adrian McDonald, President of Dell EMEA, and Mohammed Amin, SVP at Dell Technologies, during LEAP 2025, a meaningful step in our growing strategic collaboration.

As Saudi Arabia advances its digital transformation, our partnership with Dell Technologies stands at the forefront of shaping the next generation of AI-powered enterprise solutions.

# Our Offerings

# Comprehensive AI Solutions to Drive Your Organization Forward

## AI Strategy Development

- ✓ Custom AI strategies aligned with industry needs and client requirements.
- ✓ Guidance on building AI-ready organizational structures.
- ✓ Development of practical AI use cases to drive meaningful business outcomes.
- ✓ Support in achieving **ISO 42001** certification for AI management, ensuring adherence to global AI standards.

## No-Code Generative AI Platform

- ✓ User-friendly, no-code platform enabling secure, in-house generative AI.
- ✓ Ensures **data privacy** within your organization's boundaries.
- ✓ Boosts team productivity and creativity with minimal technical barriers.
- ✓ Facilitates rapid adoption of AI across departments and functions.

# Comprehensive AI Solutions to Drive Your Organization Forward

## AI Implementation & Managed Services

- ✓ Full-service support for AI deployment from start to finish.
- ✓ Experienced managed services for maintenance and optimization.
- ✓ **Dedicated resources** to ensure smooth AI integration across workflows.
- ✓ Enhanced efficiency, cost-effectiveness, and innovation in AI projects.

## Takween AI Cloud Saudi-Based AI Infrastructure

- ✓ Local infrastructure in Saudi Arabia, compliant with NCA standards.
- ✓ Guarantees **data residency** and AI sovereignty within national borders.
- ✓ Affordable access to advanced AI models without requiring in-house infrastructure.
- ✓ Scalable, secure, and tailored AI capabilities for your business.

# Takween AI Platform

Instant value: Ready to use

Build your own apps without coding

Build highly complex apps

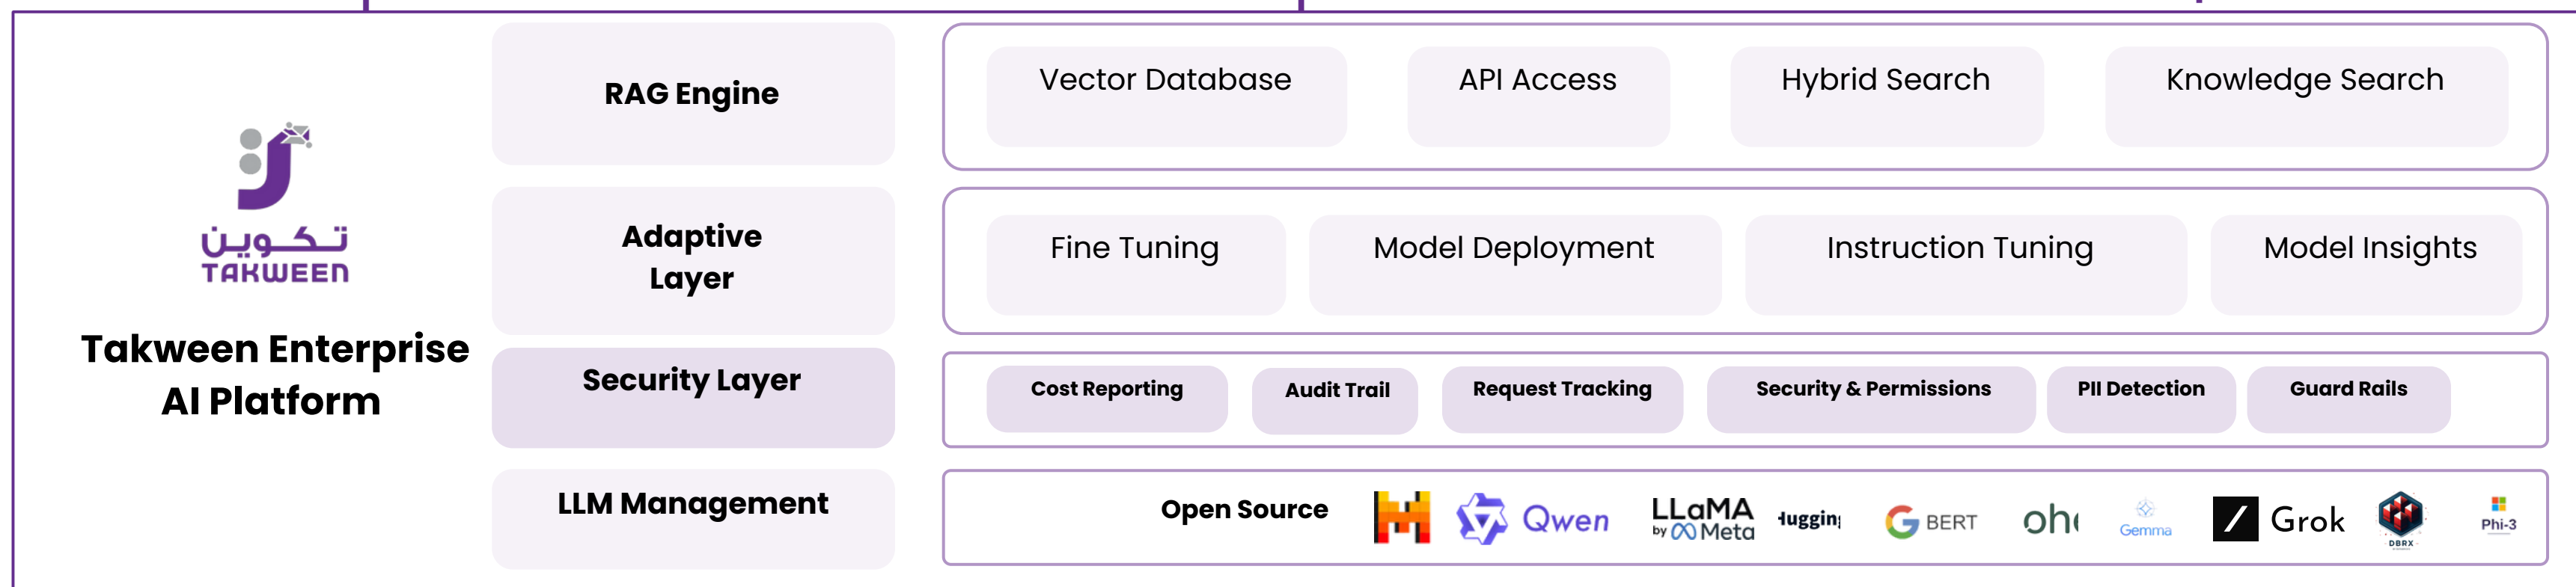

**Co-pilot Solution**

**No-code Gen AI Apps**

**CustomCode-First Gen AI Apps**

**Install on any infra**

**Any Data Sources**

**Pre-made Connectors** (upward arrow)

**Actions & Automations** (downward arrow)

# Generative AI Use-Cases

**Chatbot**

Custom AI strategies aligned with industry needs and client requirements.

**Summarise**

Transform dense text into a personalised executive overview, capturing key points from financial reports, meeting transcriptions, and more.

**Extract**

Identify and extract essential information from unstructured text or surface insights in specialised domain areas without having to create any templates.

**Search**

Build semantic search engines which understand the user's intent and the contextual meaning of terms to improve accuracy and search results.

**Content  
Moderation**

Build content moderation systems to moderate content for harmful or inappropriate content.

## Generate

- ✓ Generate content for a specific purpose with expert-level accuracy.

## Code Assist

- ✓ Assist developers in analysing and generating code in various programming languages.

## Data Analysis

- ✓ Generative AI enhances data analysis by creating synthetic data, detecting anomalies, extracting key features, and predicting future trends, all within the guard rails you set.

## Classify

- ✓ Read and classify written input with as few as zero examples.

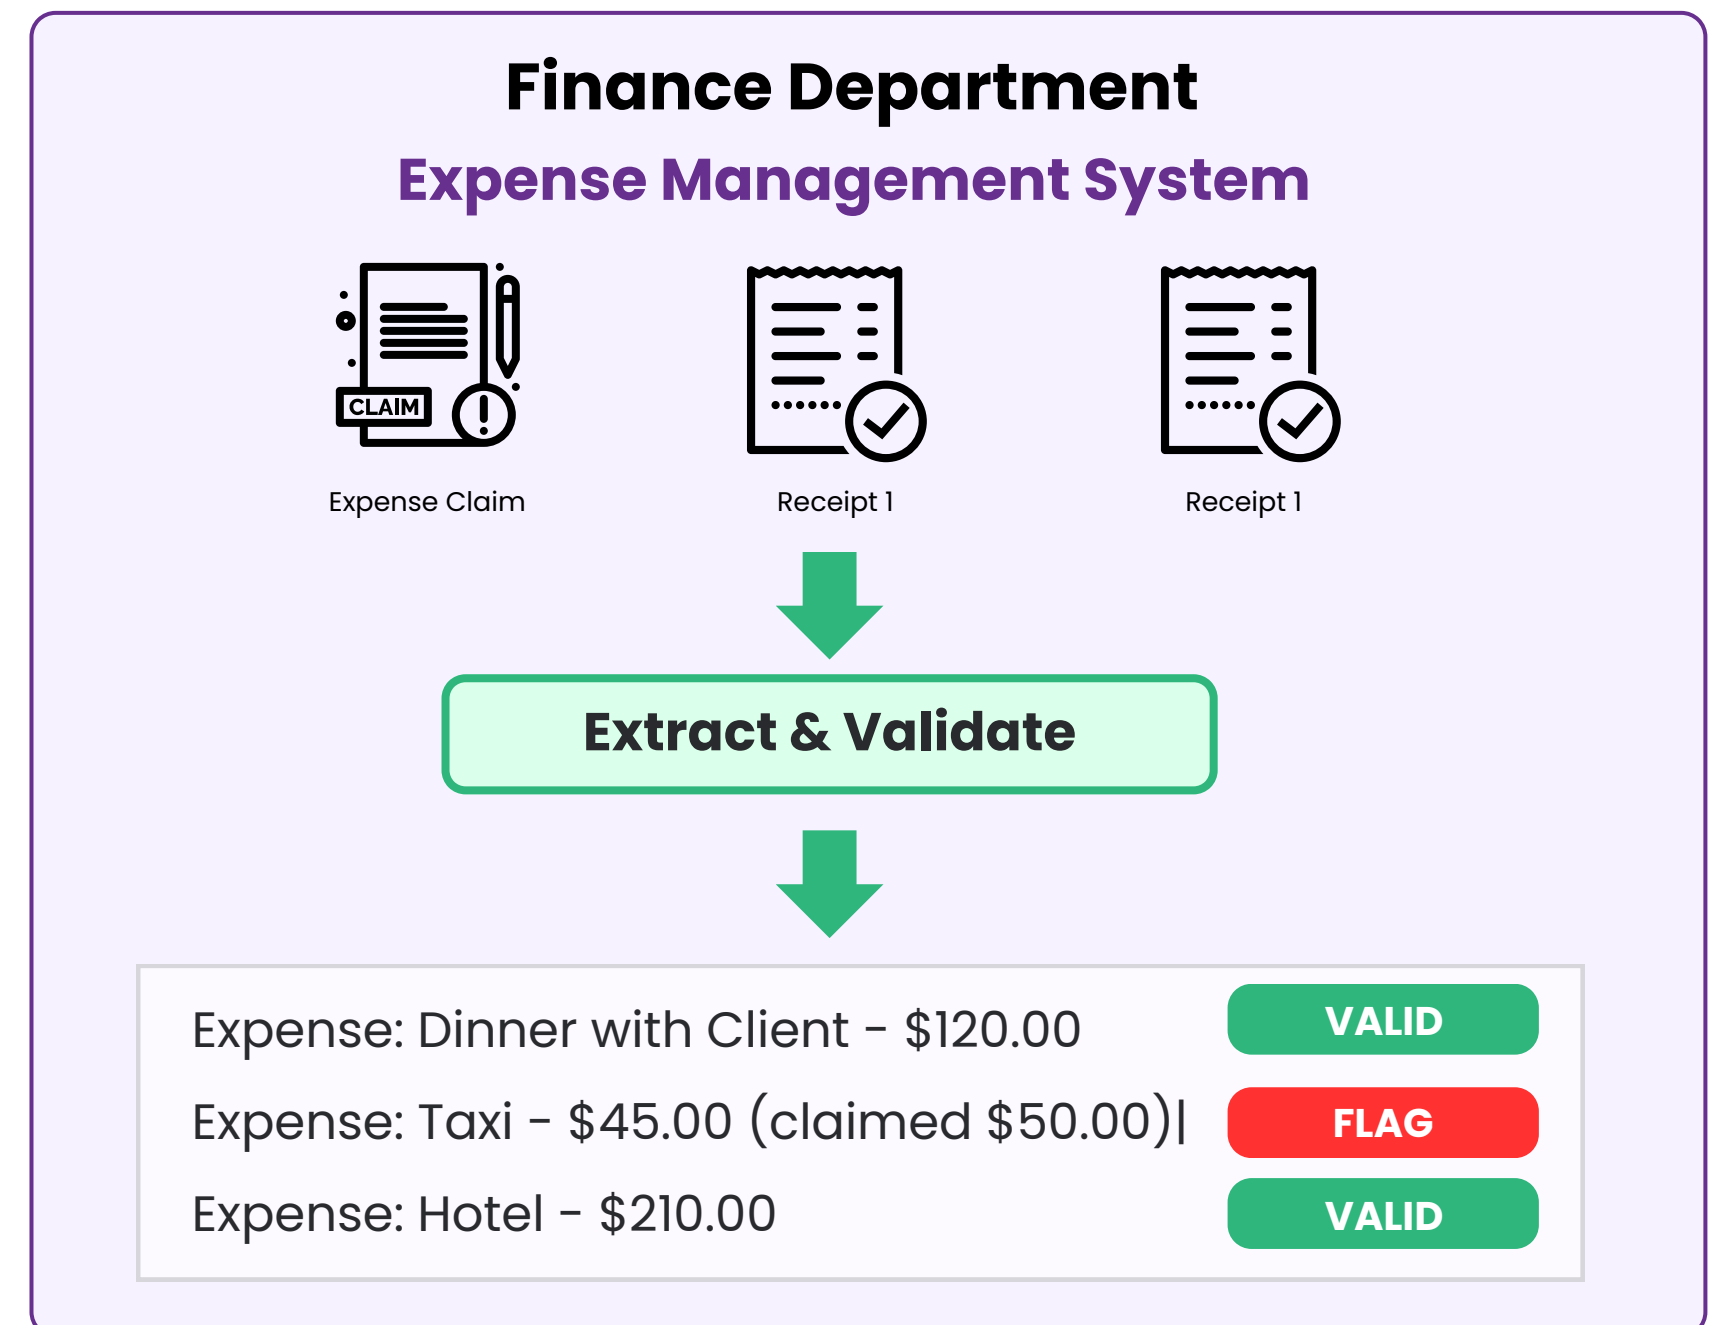

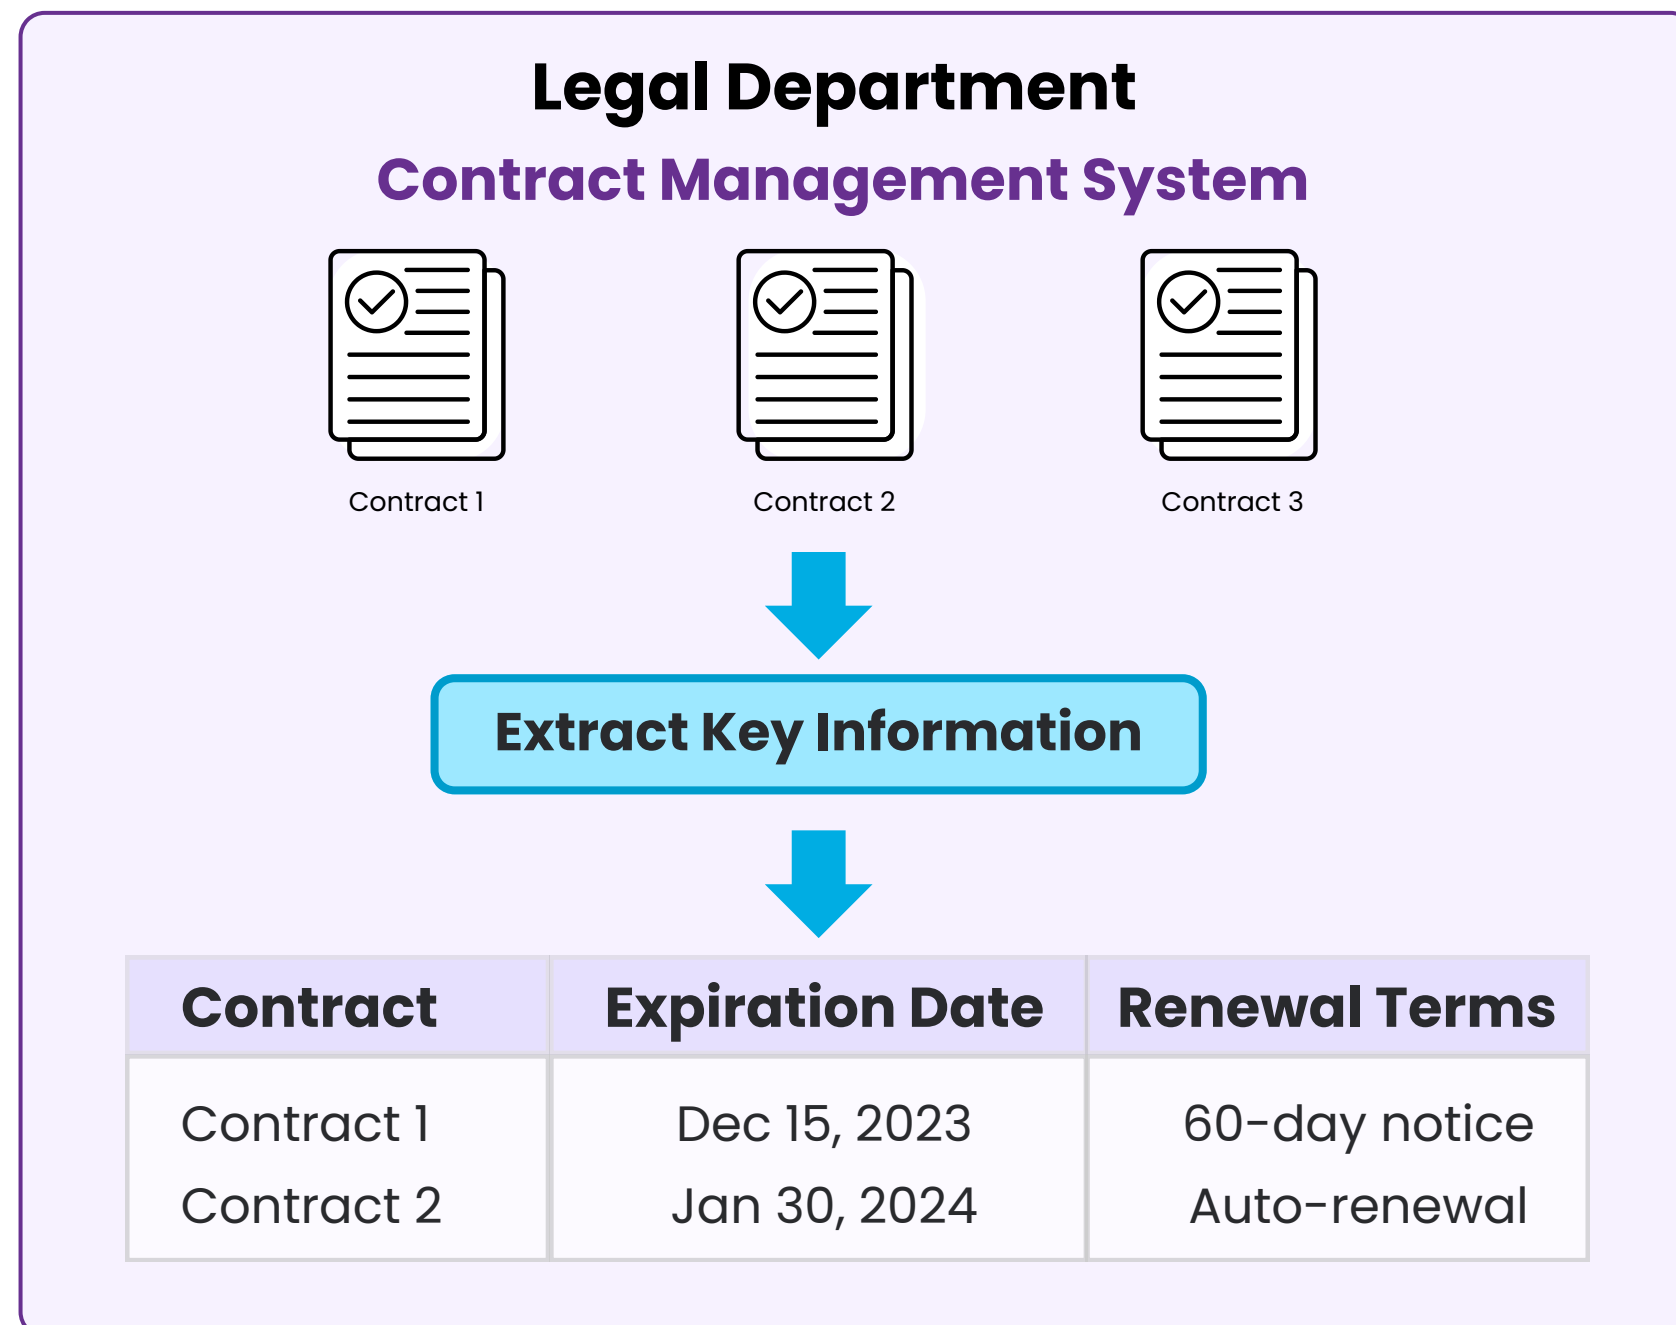

## Suggestion

- ✓ Build content moderation systems to moderate content for harmful or inappropriate content.

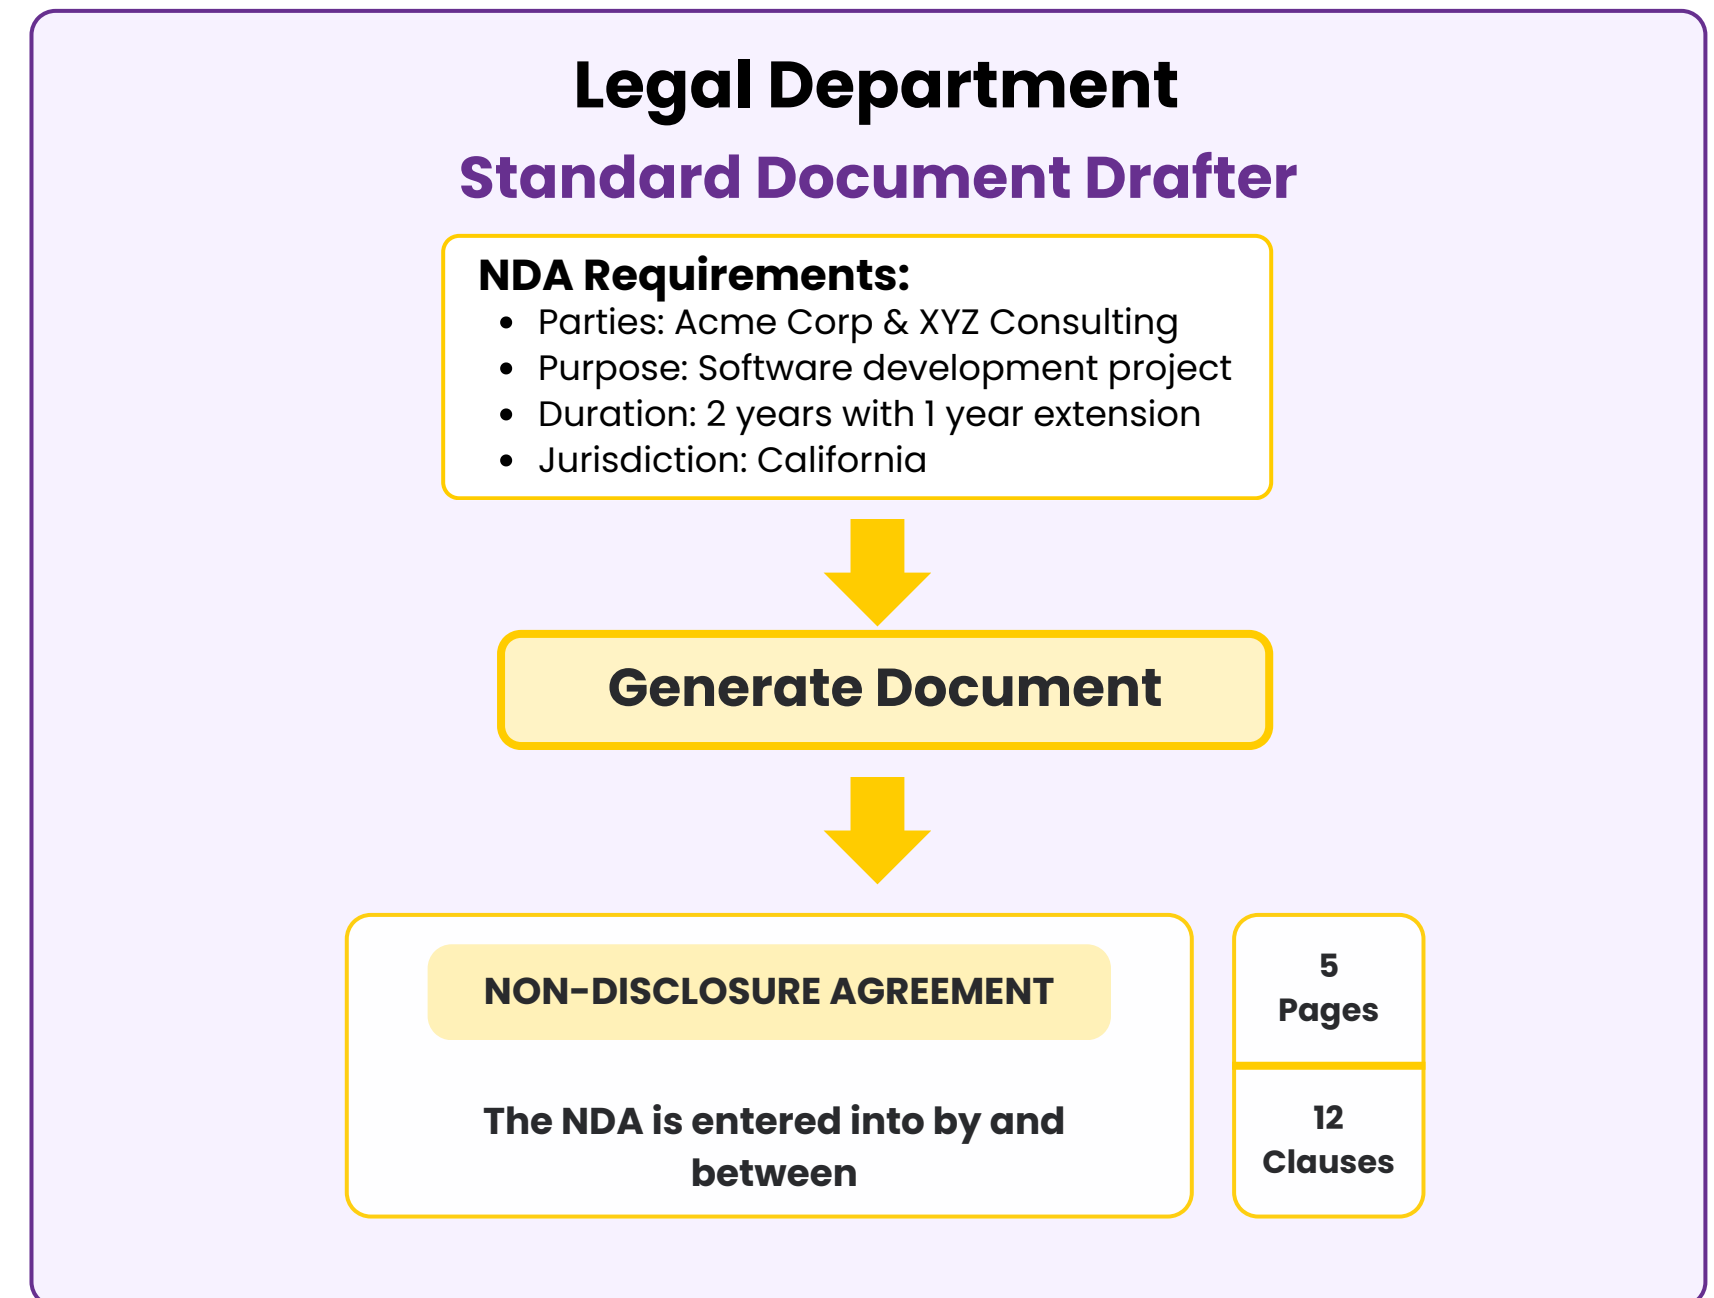

# Extract: Automate Information Retrieval from Documents

Extracts specific data points, terms, and key information from unstructured documents automatically populating structured formats without manual intervention.

# Generate: Create High-Quality Content Efficiently

Produces professional-grade content based on specific requirements, guidelines, and source materials, reducing creation time while maintaining quality and standards.

# Summarise: Distill Key Information from Lengthy Content

Condenses lengthy documents into concise overviews that capture main points, insights, and actionable information, saving time while preserving essential context.

## Audit Department Audit Report Condenser

Distill Key Information

Executive Summary

- High Risk: Data Security (p.12-15)
- Medium Risk: Vendor Management (p.27)
- Action Required: Update Protocols (p.43)

## HR Department Meeting Intelligence Tool

REC Candidate Interview

Meeting Transcript

Extract Key Points

Meeting Summary

Technical

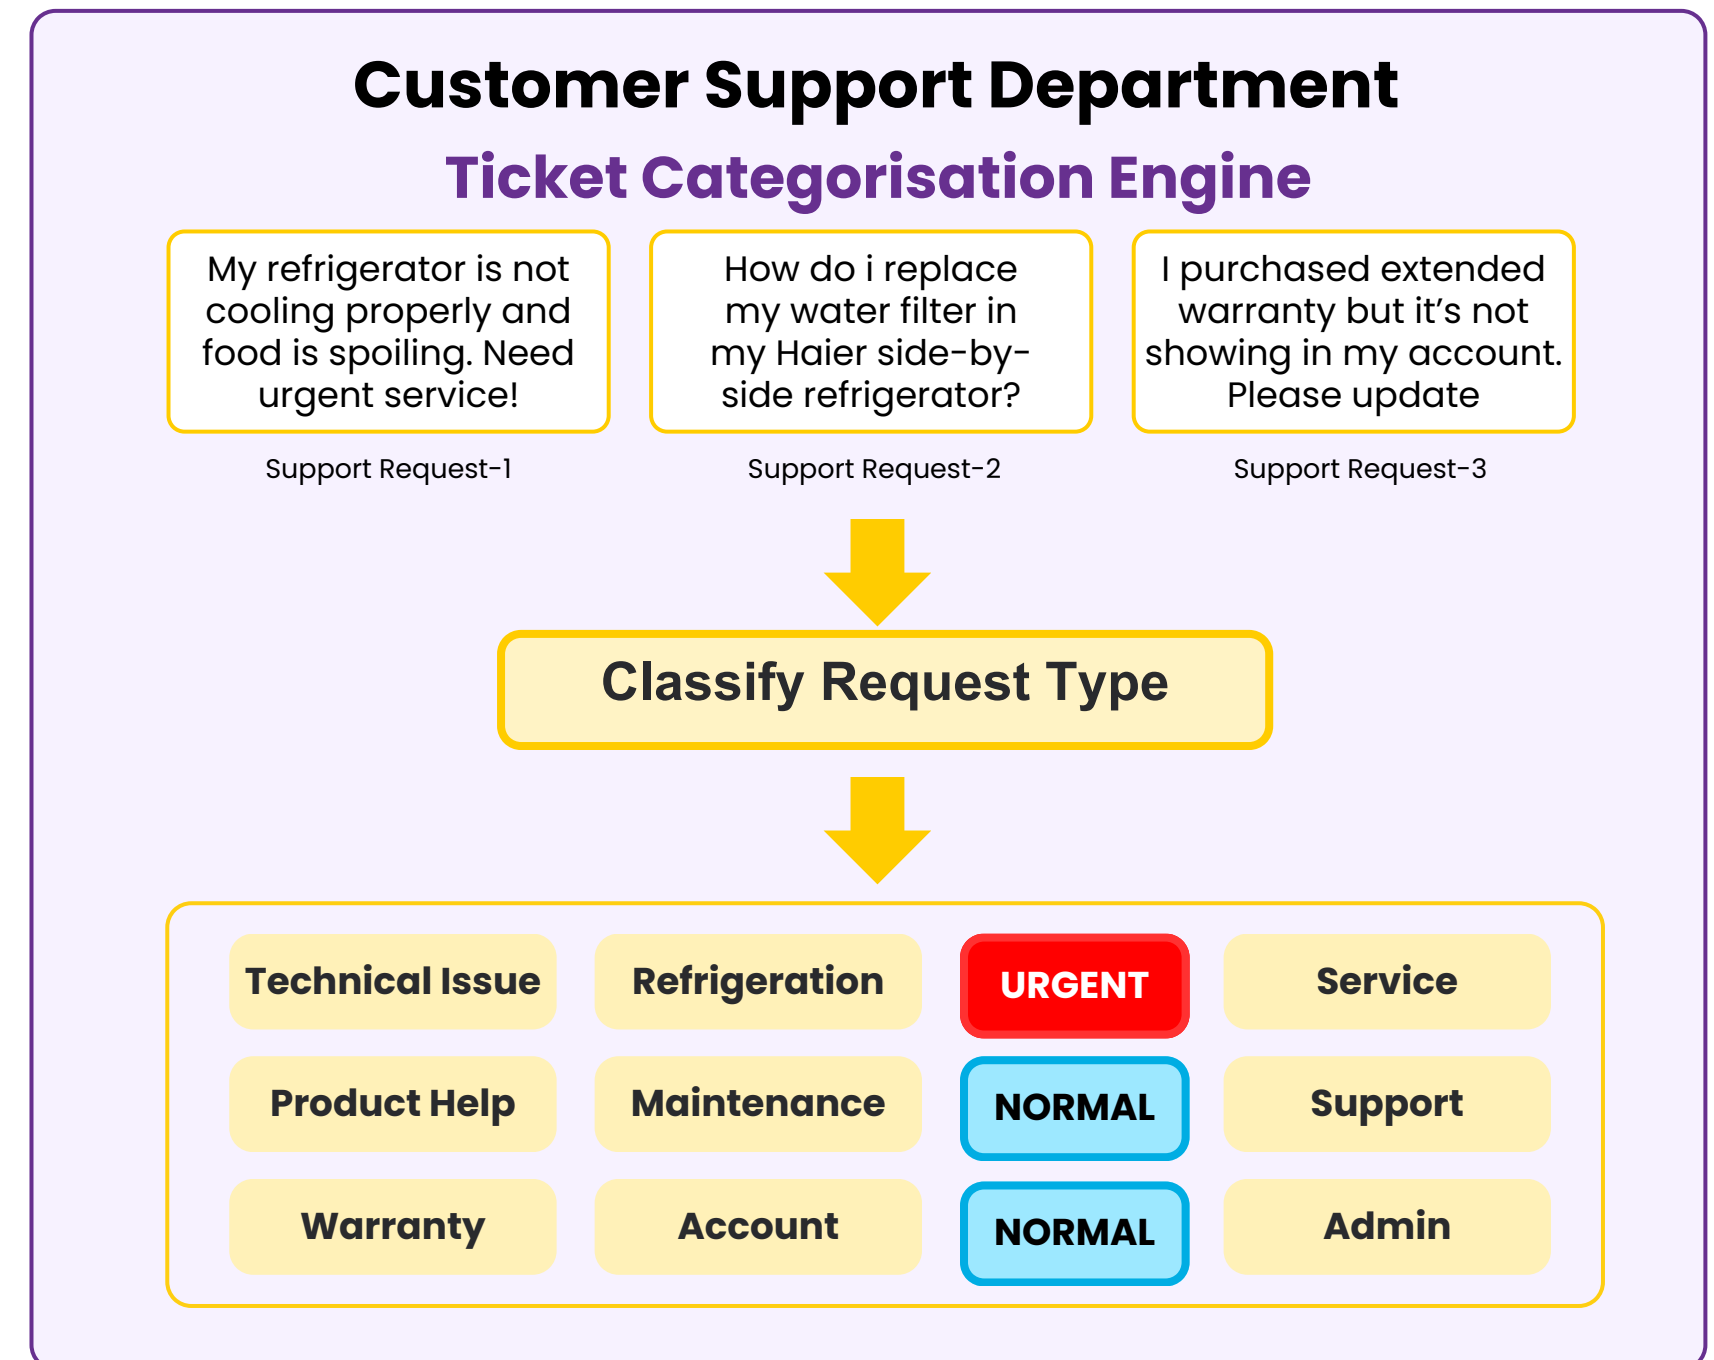

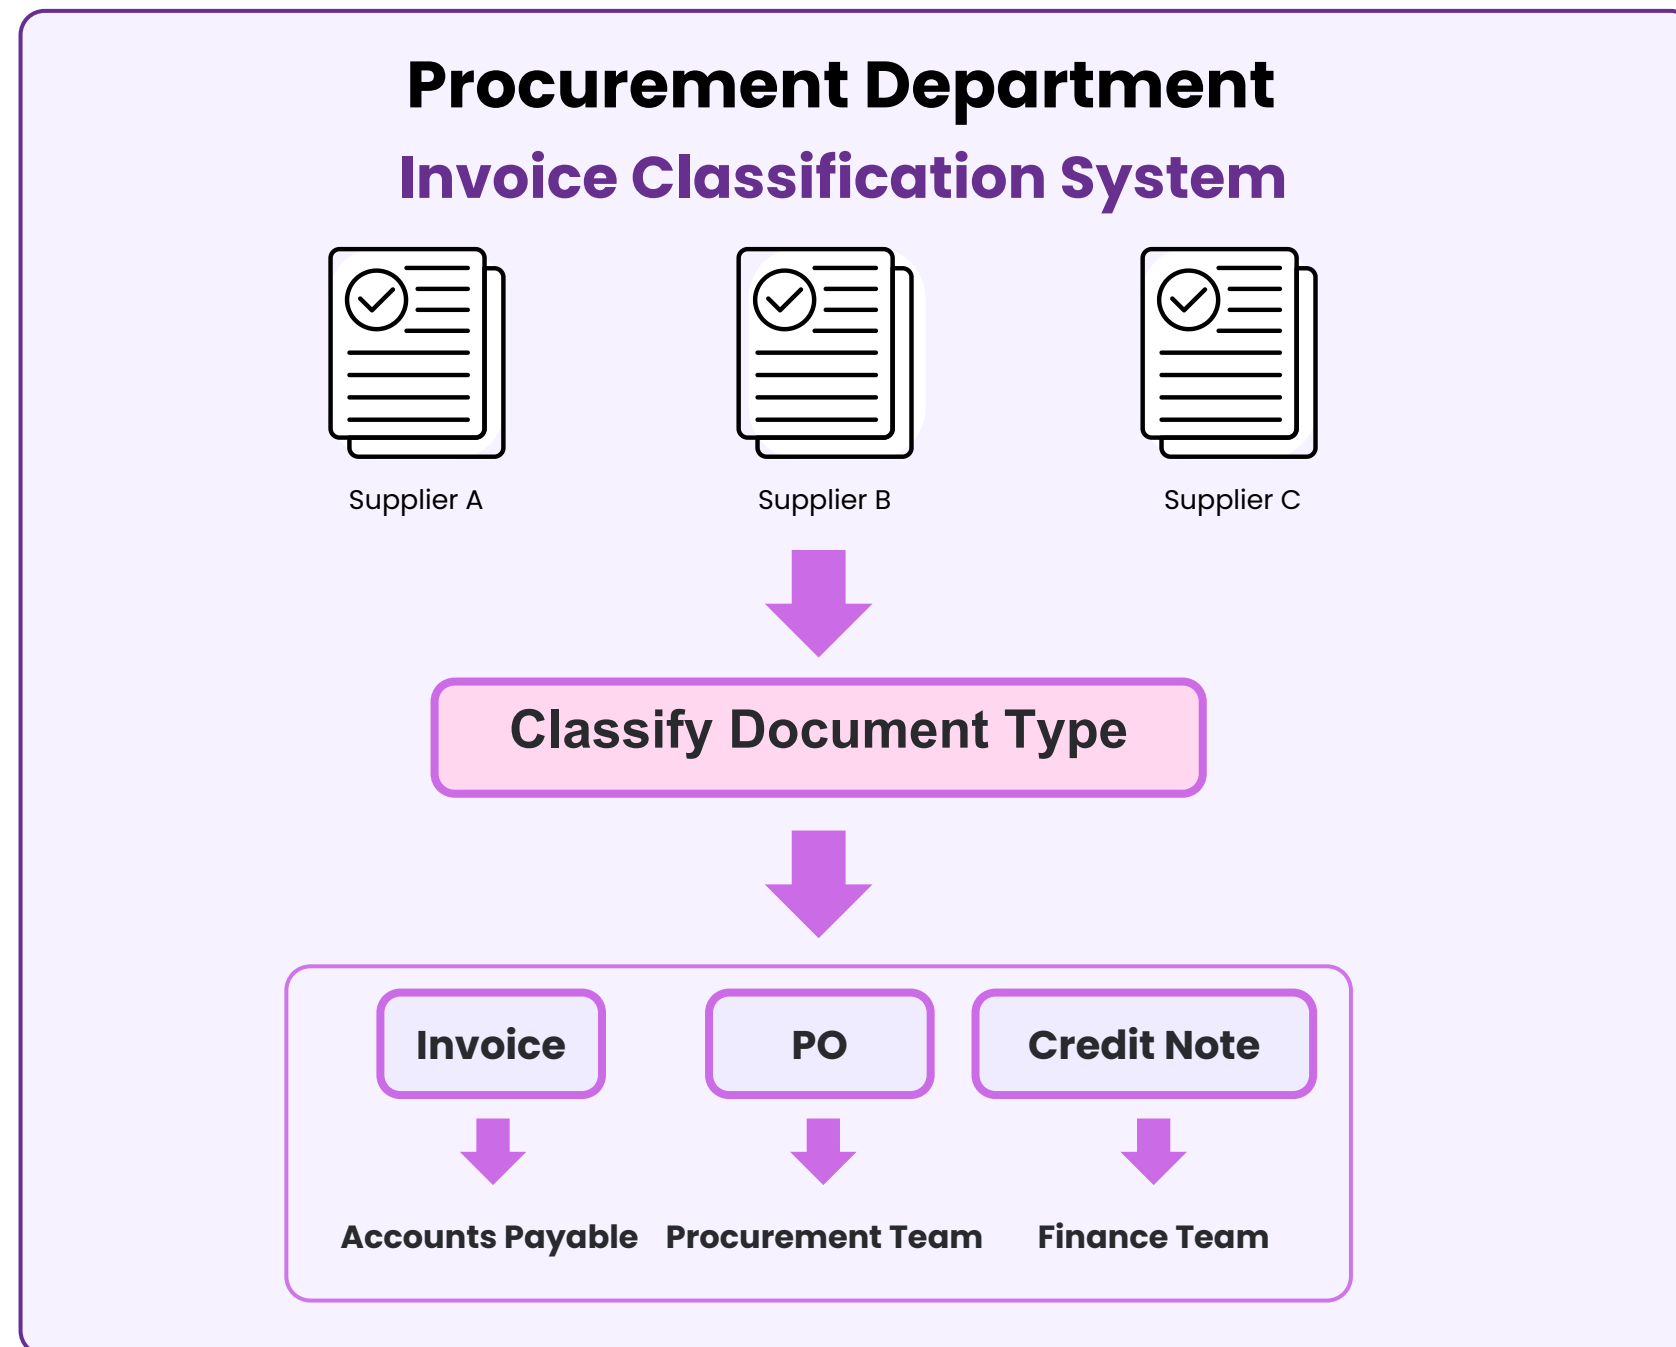

Soft

Experience

- 10+ years of industry experience
- Understands Python and SQL
- Certifications from Google and AWS

# Classify: Intelligent Content Categorisation

Automatically categorises and routes documents, requests, and communications based on their content, purpose, and priority without predefined rules or templates.
